IIRS outreach programme in the year 2007. Through this programme, over 10,000 students and researchers from 1
universities/institutes across the country have been trained in the field of geospatial technology. This was accomplished throu
ISRO's communication satellites, satellite interactive terminals and A-View software.
To further enhance the outreach of geospatial science and technology, IIRS is now introducing e-learning based certifica
course on 'Remote Sensing and Geo-information Science'. For some of you, this might be your first experience of taking up
online course. Online courses provide the learners an easy way to study and develop various skills. You have to maintain th
same standards of excellence that are required in face-to-face courses. You will come to know that, as an online learner, se
motivation and discipline are very important. You are completely responsible for managing a regular and methodical stu
system.
We are offering eight basic level programmes in e-learning mode. They are: Image Statistics, Basics of Remote Sensin
Photogrammetry and Cartography, Digital Image Processing, Geographical Information System, Global Positioning Syste
